

Bluegiga Case Study mobileFX WRAPFinder2

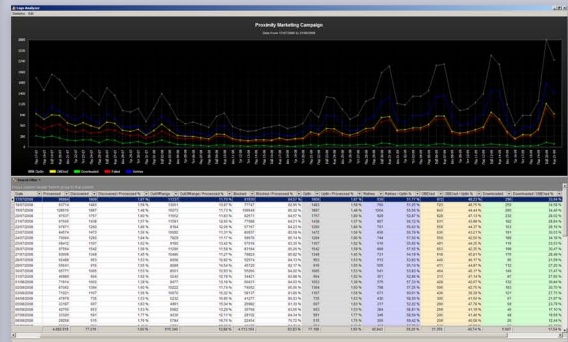

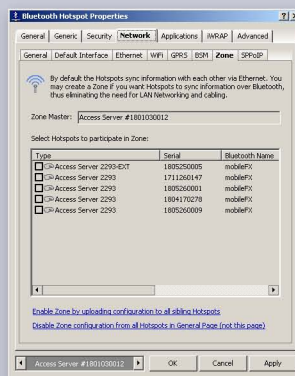

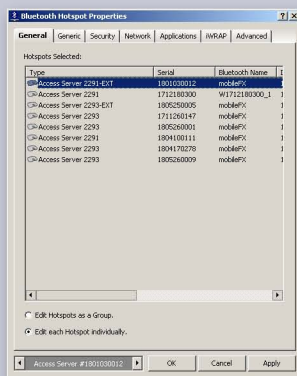

mobileFX™ WRAPFinder2

Bluetooth Hotspot Management Console & Statistics Parser

Bluegiga WRAP Finder 2 is a Windows software tool for easily managing your Access Servers and Access Points over Ethernet. With it you can easily perform configuration and administration tasks, from the simplest to the more advanced, including re-flashing an Access Server with an RS232 cable.

The Logs Analyzer feature allows you to import OBEXSender Logs or BSM Reports and obtain reliable statistics about your Proximity Marketing campaigns. Processed Data can be easily exported to Microsoft EXCEL for further processing and the Graph can be saved as an image file for producing elegant marketing reports.

Type	Model	Serial	Bluetooth Name	IP	MAC	Firmware	Status	Timestamp
Access Server	2291	1712180300	W1712180300_1	192.168.1.2	00:07:80:00:30:49	3.2		
Access Server	2291	1804100111	mobileFX	192.168.1.6	00:07:80:00:30:50	3.2		
Access Server	2293-EXT	1805250005	mobileFX	192.168.1.11	00:07:80:00:07:6A	3.2		
Access Server	2291-EXT	1805260001	mobileFX	192.168.1.13	00:07:80:00:30:8F	3.2		
Access Server	2293	1804170278	mobileFX	192.168.1.7	00:07:80:00:05:99	3.2		
Access Server	2293	1712180447	mobileFX	192.168.1.9	00:07:80:00:33:7C	3.2		
Access Server	2293	1805260009	mobileFX	192.168.1.9	00:07:80:00:08:EE	3.2		
Access Server	2293	1805260009	mobileFX	192.168.1.10	00:07:80:00:08:C7	3.2		
Access Point	3021	0808270475	mobileFX	192.168.1.5	00:07:80:00:15:70	3.9vcs.1860		
Access Point	3021	0808270485	mobileFX	192.168.1.12	00:07:80:00:15:70	3.9vcs.1860		

- Easy and straight-forward User Interface making it the ideal Getting Started tool
- Can deploy Mobile Content and automatically edit configuration files
- Can download OBEXSender statistics with tarball method (compresses statistics before download them)
- Displays Hotspot Properties in a Windows Property Page
- Can manage more than one Hotspots at a Time
- Can manage Hotspots as a Group
- Can deploy WPK packages to any number of Hotspots simultaneously
- Can edit Configuration Files in color-syntax editor simultaneously
- Can view Log Files simultaneously
- Can issue asynchronous commands simultaneously
- Can easily setup key tasks with a single click (Enable USB logging, Create Bluetooth PAN Zones, etc)
- Operates by creating simultaneous Network Threads
- Can assist you performing low-level reflash using RS232 cable.
- It uses special optimization logic for minimizing Network Bandwidth (only changes are applied)
